EDUCATION

COLUMBIA UNIVERSITY, School of International and Public Affairs New York, NY
MPA, Urban and Social Policy Concentration 2026 (*Expected*)

- Dean's Distinguished Fellowship 2025-26
- Relevant coursework: Seminar in Urban and Social Policy, Meeting the Climate Challenge at All Levels of Government, Microeconomic Analysis for Public Affairs

COLUMBIA UNIVERSITY, Graduate School of Arts and Sciences New York, NY
MA, Quantitative Methods in the Social Sciences, *4.0 GPA* *2025*

WESTERN WASHINGTON UNIVERSITY, College of Business and Economics Bellingham, WA
BA, Marketing; Minors in Psychology, Analytics for Business, *3.9 GPA* *2018*

- Magna Cum Laude, Named the Outstanding Discipline Graduate in Marketing, 2021

PROFESSIONAL EXPERIENCE

BARNARD COLLEGE, Department of History New York, NY
Research Assistant *January 2025 - Present*

- Assist Dr. Gergely Baics with data cleaning, address parsing, and geocoding for historical NYC City Directory data, mostly using Pandas.
- Build custom Python record linkage algorithm using Bayesian machine learning algorithm (Splink) to match 9+ million city directory records
- Tune model parameters and pre/post-process data to optimize matching accuracy and reliability.

DYNATA, Global Research and Data Science Center of Excellence Seattle, WA
Research Analyst *November 2021 – May 2024*

- Designed survey materials and applied significance testing, weighting, regression models to understand the impact of branded advertising on consumer sentiment.
- Consulted with clients to meet research needs, explained research methodologies, and gave reporting presentations for audiences with wide-ranging statistical knowledge.

SELECTED PROJECTS

Evaluating RapidRide Bus Reliability Using Bayesian Additive Regression Trees *Spring 2025*
Master's Thesis, Quantitative Methods in the Social Sciences

- Applied Bayesian Additive Regression Trees and hierarchical modeling in R for causal estimation of average treatment effect of RapidRide bus upgrades on reliability in Seattle, WA.
- Used AWS Lambda to automate General Transit Feed Specification API calls and data storage, created a pipeline in Python to a locally hosted SQL database, used Google Cloud for model deployment.
- Applied spatial data management to clip routes to stops and get weighted traffic/demographic information by route shape.
- 3rd Place, GSAS SynThesis Competition, 2025

Spatio-Temporal Modeling of NYC Collision Data for Causal Inference *Summer 2025*

- Modeled the impact of Congestion Pricing on census block group-level vehicle collision counts using R and Stan
- Implemented spatial autoregression (ICAR) and time series model components, along with Difference-in-Difference term, to correctly account for variance in outcome variable within the causal framework.
- Created a suite of data visualizations and posted three blog posts on personal github.io website.

Censorship in Modern America *Spring 2025*

- Used Python and Streamlit to create webpage with custom, interactive, and visually pleasing data visualizations to explore what censorship looks like in modern America.
- Used GitHub for version control and collaboration within a three-person team.

Branded Resale Project *2021 - 2024*

- Undergraduate research project with Dr. Catherine Armstrong Soule and Dr. Sara Hanson investigating consumer behavior impacts of secondhand sales by traditional retailers.
- Presented at the Behavioral Insights into Business for Social Good (2024) and Annual Society for Consumer Psychology (2022) conferences.

ADDITIONAL SKILLS

Applied regression modeling, cross-validation, model selection, multilevel regression and post-stratification, data visualization (R and Python), GitHub, Stan, dataset creation
