

Education

Columbia University 2024 – Present	MA, Quantitative Methods in the Social Sciences (GSAS) MPA, Public Administration (SIPA) - 4.0/4.0 GPA; Awarded Dean’s Distinguished Fellowship 2025 – 26
Western Washington University 2018 - 2021	BA, Marketing; Minors in Psychology, Analytics for Business - Named the Outstanding Discipline Graduate in Marketing, 2021

Professional Experience

Department of History, Barnard College January 2025 – Present	Departmental Research Assistant, Urban Studies Department - Assist Dr. Gergely Baics with Mapping Historical New York project. - Data cleaning, address parsing, and geocoding with Python, mostly using Pandas. - Created a record linkage algorithm to track individuals across survey years, used vectorized method to efficiently handle matching across over 9 million observations.
Dynata, LLC November 2021 – May 2024	Analyst, Research; Global Research and Data Science Center of Excellence - Designed survey-based advertising effectiveness research to understand the impact of branded advertising on consumer sentiment. - Applied significance testing, weighting, regressions to research questions. - Consulted with a diverse set of clients to meet research needs, explained research methodologies during research process, and gave final reporting presentations for audiences with wide-ranging statistical knowledge.
Eventcore June 2019 – September 2019	Data Analytics Intern - Created custom Excel tools for upper management to assist with executive decision making.

Projects

Evaluating RapidRide Bus Reliability Using Bayesian Additive Regression Trees (Master’s Thesis) 2025	- Applied Bayesian Additive Regression Trees and hierarchical modeling in R to a causal inference framework to estimate average treatment effect of RapidRide bus upgrades on reliability in Seattle, WA. - Used AWS Lambda to automate General Transit Feed Specification API calls and data storage, created a pipeline in Python to a SQL database. - Applied spatial data management to clip routes to stops and get weighted traffic and demographic information by route shape. - 3rd Place, GSAS SynThesis Competition, 2025
Censorship in Modern America 2025	- Data visualization project focused on exploring censorship in modern America. - Used Python and Streamlit to create a public webpage with custom, interactive, and visually-pleasing visualizations based on publicly-available data. - Used GitHub for version control and collaboration within a three-person team.
‘SecondBrand’ Project 2021 – 2024	- Research project with Dr. Catherine Armstrong Soule and Dr. Sara Hanson investigating brand extension via secondhand sales by traditional retailers. - Conducted literature reviews to apply conceptual frameworks to this phenomenon. - I presented this research at the Behavioral Insights into Business for Social Good (2024) and Annual Society for Consumer Psychology (2022) conferences.

Other Technical Skills

Applied regression modeling, cross-validation, model selection, multilevel regression and post-stratification, data visualization (R and Python), GitHub, Stan
